

# Collection Lockers.

## Simple & Secure Click & Collect Solutions.

The Ripple Collection Locker makes offering contact-less collection services a reality for all businesses. Without the need for a costly automated system, this collection locker can either be manually opened and the pin reset at the unit using either a master code or physical key, alternatively, it can be controlled using the Remote Allocation System, which is a simple and secure web-based application.

## Perfect for retail and trade.

The standard format of collection locker has been designed with builders merchants and trade centres in mind where large orders, (40 litres of paint for example) need to be collected swiftly and securely.

Each of the three lockers contains approximately 100 litres of storage and includes an optional, height adjustable shelf.

If your business requires a different solution, please chat with the team about a bespoke build.

## Peace of mind for you and your customers

---

The Ripple Collection Locker features a durable, tamper-proof and weatherproof steel construction, meaning that it can be securely positioned either indoors or outdoors and anchored in place. The lockers are secured with a pin locking system and intuitive three-point bolting lock, designed in house at Ripple.

The locking system can either be set up manually at the unit for each customer prior to collection, or it can be remotely configured via the Remote Allocation System (RAS) which is a simple web based service that is easy to use and to integrate within your business.

**Designed and made  
in Britain at our  
premises, direct to  
you from our factory.**

---

We're industry-leading and award-winning designers and manufacturers of specialist retail interiors. Established over 35 years ago, our DNA is geared towards producing only the very best quality solutions, that confront real world problems for retailers and businesses across the UK.

**1:** Strong Steel Construction

**2:** Three-point Bolting Lock

**3:** Pin Locking System

**4:** Anchoring Points

**5:** Weatherproof Finish

**6:** Shelving Options

**Designed in  
collaboration  
with leading trade  
retailers.**

Making the collection locker solution as accessible as possible was high on our agenda during the design process.

Many of the other solutions available on the market require either a complicated infrastructure change or to become tied into a third party service. Our lockers are completely managed by you at the store level, meaning that it's the perfect solution for businesses of all sizes.

**Make yours an  
extension of your  
brand.**

Design your own.

---

With custom powder-coating and a vinyl graphics you can make your collection locker an extention of your brand or to convey important messaging on how to use the system.

Here at Ripple we can also cater the collection locker towards your besoke requirements, whether you require a different size, shape, number of lockers and much more.

Please enquire to discuss bespoke designs.
